

The GENREV!™ Pipeline Discipline

One row per opportunity. Five moves. Everything owned.

Three Rules That Make It Work

NO WEIGHTED MATH

A \$500K deal at 50% is not "\$250K."
Orders happen or they do not.
Probability ranks deals; it does not discount them.

NOTHING DELETED

Lost deals stay, with the reason.
Every note is permanent.
History is where the lessons live.

EVERYTHING OWNED

Every action has an owner and a due date. Past due turns red by itself.

What Everyone Sees, Automatically

Live grand totals • Pipeline by status, probability, and opportunity type • Gross margin on every deal
Customers vs. opportunities (sales leakage) • 4-chart dashboard • Full bilingual EN/ES operation

The discipline is simple. The results are not small.
